

# Get peace of mind with one complete security and computer optimization solution

## Bell Business Internet Security Pack

Your business can't afford unexpected downtime due to security related Internet problems and computer performance delays. Without proper precautions, you could harm your customer experience, reputation and bottom line.

Bell can help protect your business with a comprehensive solution that is simple to set up, use and maintain.

### The solution

Bell Business Internet Security Pack is a complete, hassle-free solution for your business, where you do not need to invest in dedicated IT staff or additional hardware. With the data backup feature, you can rest assured that your most important information is safely stored in a secure facility on Bell premises. With this solution, you can improve and maintain computer performance. Plus, this fully managed security solution helps safeguard your computers against Internet threats with real-time protection.

For extra convenience, you can pay-as-you-go on a monthly basis and you'll have unlimited 24/7 access to Bell technical support, for added peace of mind.

### Features and benefits

Feature	Description	Benefit
Business Vault	A data backup feature that automatically backs up and stores business data in a secure, remote location, and allows for document sharing from any Web browser.	Setting up the schedule and files to backup is easy and automatic. Access or share your data anytime, anywhere with colleagues and customers.
Disk Optimizer	This PC diagnostic and repair tool provides easy to use disk defragmentation which organizes files on the hard drive. It also provides cleanup tools that search for and remove unnecessary files that can clutter computers and slow down performance.	Improves and maintains PC performance by automatically tuning up your computer on a regular basis.
Anti-virus	Computer protection that runs constantly in the background, scanning hard drives and memory to identify, remove, quarantine and disinfect suspicious files that can overwrite system files and corrupt data.	Enhances productivity and protects critical data by helping to shield your computers against online threats that can spread to other files, disks or computers.

Feature	Description	Benefit
Firewall	Blocks unwanted intruders by automatically monitoring traffic that enters and leaves computers.	Helps you ensure business data remains confidential and proprietary.
Anti-spyware	Real-time, automatic protection that prevents tracking of online activities.	Safeguards banking, customer, credit card and other private information.
Fraud Protection	Proactively protects from known fraudulent Web sites designed to capture and distribute critical business information.	Protects confidential and sensitive data.
Content Filtering	A tool that lets the administrator limit and manage Internet access to users on your business network, to prevent employees and others from accessing inappropriate sites.	Helps control the online activities of employees.
One-time installation	Easy to use Web interface, automatic software updates and instant notifications allow for successful installation in one easy step.	One-time installation and automatic, continuous updates ensure business information is protected indefinitely.
Automatic Renewal	No need to buy new software every year or remember when to renew a software contract.	Automatic renewals and software updates mean a hassle-free, secure Internet connection at all times, with one less invoice to manage.

## Why choose Bell?

Bell has extensive experience providing comprehensive backup and security solutions to customers of any size, helping them manage their business more effectively. With end-to-end solutions that deliver high standards of service and support, Bell offers customers the convenience of having one supplier for all their needs.
