

# Billing simplicity with Online Bill Manager from Bell

Online Bill Manager (OBM) is a free online tool that provides a secure central view of your Bell billing statements\*. OBM can help ease the burden of managing multiple paper bills with powerful reporting and analysis features that allow you to allocate costs to improve the operation of your business.

OBM provides a detailed and downloadable view of your data that enables your business to more effectively analyze usage and billing details – allowing you to improve productivity, monitor employee use, forecast future spending and save money.

Review usage patterns and trends to better predict and manage budgets.

Register today to begin using Bell Online Bill Manager for free at [www.bell.ca/obm](http://www.bell.ca/obm).

In need of assistance? Our knowledgeable OBM Consultants are available to assist you with everything from initial set-up to training and ongoing support.

### Manage telecommunication and IT costs more effectively

Online Bill Manager provides businesses with a consolidated view of their Bell information and communication technology bills and offers the ability to analyze these costs via a variety of features including:

#### Billing information anytime, anywhere

Secure 24/7 access to all of your billing information via any PC with an internet connection. No more waiting for bills - access your most recent billing information as soon as it becomes available.

#### Customized reporting

Save hours each month by customizing reports and paying bills online. Create custom reports to perform complex data mining and analysis. View, organize and export detailed or summary data in XML, CSV or PDF formats.

#### Simplified charge allocation

Cost allocation is simplified through customized hierarchies, where you can assign costs by office location, department, employee or cost centre and upload this information directly into your internal accounting program.

#### Powerful call pattern analysis

Gain insight and better control over your spending with OBM reports. Analyze your calling patterns and billing details to better predict and manage budgets, quickly monitor employee usage, and review equipment costs.

#### Automatic reporting and notification

Schedule reports to run at intervals that suit your requirements — weekly, bi-weekly or monthly. Email notifications alert you of new bills, detailed data or scheduled reports that are ready to view and download.

#### Access for multiple users

Permit or restrict access by cost allocation group, department or office location for customized views that suit individual roles within the business.

Using OBM in your company's monthly billing and reconciliation process can save you time and help manage your telecommunications resources more efficiently.

#### Harness the power of OBM with OBM Consulting

OBM Consulting from Bell can ensure you take full advantage of the benefits that OBM has to offer. Whether it's a one-time consultation or ongoing support, this fee-based service provides you with advice and instruction tailored to your unique business needs including:

- **Registration** — registering invoices online
- **Basic set-up** — establishing pre-authorized payments, hierarchies, nodes or reports
- **Advanced set-up** — assisting or creating tailored hierarchies and cost allocation groupings
- **Customized training** — providing personalized training programs and demonstrations to meet specific business needs
- **Reporting** — one-time or on-going assistance to design and generate custom reports

OBM dedicated consultants will provide your business with valuable insight into every part of the OBM process and capabilities.
