

Virtual Server from Bell

Become a private-label Web hosting provider with Bell

Offering Web hosting can provide a valuable service to your customers, but the complexity and cost of building and managing your own infrastructure can lead to more headaches than opportunities.

Leveraging a reliable, turnkey solution is an efficient and effective way to offer your customers private-label Web hosting – without the hassle.

Solution

Expand your business by leveraging Virtual Server from Bell, a private-label Web site hosting solution that allows you to provide your customers with reliable hosting service. Virtual Server provides your business with the memory, disk space and bandwidth allotments to support any number of Web sites. Bell will also maintain the infrastructure while you focus on your business.

Service features

With Virtual Server, you can choose the plan that is ideally suited to your business:

Virtual Server packages	Domain allotment	Disk space	Email storage	Mailboxes	Transfer limit
Virtual Server Essential	Up to 20 domains	6 GB	37.5 GB	375	720 GB
Virtual Server Plus	Up to 50 domains	15 GB	93.8 GB	938	1,776 GB

Business benefits

Virtual Server offers many benefits for your business, including:

- Improved sales opportunities with flexible proven turnkey reseller packages that quickly turn your business into a private-label hosting provider
- Simplified online tools enable you to control the branding of your service, as well as billing, account management and domain management
- Increased peace-of-mind through reliable Web site hosting backed by Bell – a trusted provider of Web site hosting services
- Complete support when you need it via a bilingual 24/7 live help desk
- Reduced strain on internal resources by having Bell maintain the hardware and base operating system of your Web hosting service

Why choose Bell?

Bell has extensive experience delivering advanced Virtual Server solutions. Backed by a sophisticated and comprehensive network of resources, Bell can provide high standards of reliability, service and support. Offering complete end-to-end solutions, Bell can meet the evolving requirements of any business.

Bell operates one of the most established and respected IT infrastructures in the country, and countless businesses in Canada trust Bell for:

- The power, performance and reliability of one of the country's largest IP infrastructure
- Industry-leading IT and networking expertise and resources
- Consistent levels of service, reliability and performance
- A strong commitment and track record of performance in developing customer-focused solutions
