

# Mobile solutions for construction.

Build stronger connections between you and your teams.

With employees working both in the office and out on job sites, instant and reliable communication is essential in the construction industry. Mobile solutions from Bell allow for efficient and timely sharing of vital information, real-time reporting and fast response to architectural plan changes or emergencies that may occur on the job. A closely connected workforce is more productive and better equipped to complete projects on budget and on time. Bell also offers mobile solutions that allow you to manage and track valuable machinery and equipment, giving you greater control over your operational expenses.

## Push-to-talk.

Connect instantly with the push of a button.

- Keep projects on track by efficiently collaborating with project managers, design engineers, and subcontractors throughout Canada and the U.S.
- Make PTT calls with up to 249 people at once, while simultaneously checking emails
- Reduce mobile inventory costs by eliminating the need for employees to use multiple devices
- Monitor the safety of your workers with man-down detection that connects injured workers directly to emergency centres through speakerphone (available on select devices)<sup>1</sup>

## Workforce management and digital forms.

Collect work data on site and send to the office instantly.

- Review work schedules with proof of hours worked in real time
- Save time and reduce fuel costs by mobilizing business forms and avoiding unnecessary trips to the office
- Monitor task completions and track work orders
- Capture client signatures digitally and reduce paper costs

Samsung Galaxy Rugby™ LTE

## Why choose mobile solutions from Bell?

- Industry-specific solutions
- Access to Canada's largest LTE network<sup>2</sup>
- Cross-border coverage that reaches over 90% of the U.S. population<sup>3</sup>
- Dedicated account support team
- Network of industry leading partners and suppliers

## Asset management.

Monitor and track your equipment and vehicles.

- Keep track of your diverse assets and continuously monitor equipment usage, allowing you to right-size your fleet
- Eliminate side jobs and curb after hours use
- Prevent theft of materials on site
- Receive real-time diagnostic alerts to optimize vehicle maintenance and reduce repair costs, allowing you to keep your machinery running longer

## Expense management.

Monitor mobile device usage.

- Manage and control your team's data, voice and text message usage
- Receive alerts for important events like roaming
- Track overtime usage to reduce overall operating expenses

## Mobile Internet access.

- Control costs with one hotspot for multiple devices
- Keep your team connected on Canada's largest LTE network<sup>2</sup>
