

Minimize your downtime and risk

Server Replication service from Bell

Any size business needs to have a business continuity (BC) and disaster recovery (DR) plan in place. A well-structured plan will help you quickly and effectively recover from unexpected interruptions so you can carry on business as usual and continue to maintain the highest levels of customer service. Bell can complement your business continuity needs by offering an affordable solution with no capital investment.

Solution

Server Replication service from Bell is a host-based offering for small and medium businesses that complements your business continuity and disaster recovery planning and execution. Cost-effective, easy to implement, and with no capital investment, this turnkey service replicates your key Microsoft systems and data to a secure site. In the event of an unplanned outage, you can easily access your most up-to-date business-critical information and maintain uptime and productivity within minutes.

Features

- Scheduled and manual failover options
- Real-time, block level replication
- Average recovery time within minutes
- Remote access to the hot-site for an unlimited number of users
- Ability to run for 5 business days from the data centre with no additional hosting costs
- Complete reporting on data transferred and failover status
- Incremental replication for storage efficiency to reduce bandwidth and storage requirements and costs to a minimum
- 24/7 support and activity reporting

Benefits

- Ability to maximize business continuity efforts for all critical business functions such as email, database, and other applications
- Improve productivity with Web-based access to business functionality
- Reduce financial risk and downtime
- Reduce additional capital equipment and labour costs
- Improve security
- Scale services up or down according to your needs with a flexible monthly subscription plan

Why choose Bell?

Bell has extensive experience providing telecommunications and IT infrastructure support to businesses of any size, helping them manage their business more effectively. Bell also operates one of the most established, secure and respected IT infrastructures in the country.

Countless businesses trust Bell for:

- The power, security and reliability of one of the country's largest IP infrastructures
- Industry leading mobility and networking expertise and resources
- Consistent levels of service, reliability and performance
- A strong commitment and track record of performance in developing customer-focused solutions
