

# Reduce travel costs and increase productivity with advanced Video Conferencing Solutions.

## Video Conferencing Solutions from Bell

Organizations are increasingly turning to video conferencing as a means to reduce travel costs, increase time efficiencies and productivity, communicate more effectively and support green initiatives. Many are looking at ways to leverage their current infrastructure investments to enhance video communications capabilities and add value to their networks. However, embracing the newest video technologies at the enterprise level often requires the extensive planning, integration and support skills of a trusted industry leader such as Bell.

### Solution

Video Conferencing Solutions from Bell are an integrated set of services designed to help businesses optimize their telepresence, conference room and desktop video capabilities. As the leading provider of enterprise Video Conferencing Solutions in Canada, we have the skills and the resources to provide end-to-end, multi-vendor interoperability and unified communications integration services for Cisco Telepresence, Tandberg systems and other hardware vendors.

Bell engineers are certified and trained in MPLS networks and video technologies, as well as unified communications integration. Building on our comprehensive core network and “cloud” capabilities, Bell has orchestrated in some of the largest enterprise Cisco and Tandberg video conferencing deployments in Canada.
