

# Streamline PCI compliance and reduce risk.

## PCI Compliance solutions from Bell

Any organization that processes, stores and transmits credit card data transactions must comply with the 12 requirements defined by the Payment Card Industry Data Security Standard (PCI DSS). Whether you are a merchant or a service provider, these standards safeguard your clients' credit information from identity theft and other threats. In order to streamline requirements and processes, organizations are turning to industry specialists such as Bell to support their PCI compliance needs.

### Solution

PCI Compliance solutions from Bell form an end-to-end portfolio of services designed to address PCI compliance needs and establish a solid security foundation within your organization. Bell specialists are experts in all aspects of PCI compliance, from requirements and deadlines to processes for mitigating and remediating gaps. As certified specialists, we can guide you through all 12 requirements set by the PCI DSS, while ensuring that your PCI initiatives support your overall security policies and programs.

### Features

Our PCI services include:

- **PCI compliance strategy and roadmap** – We develop a strategy and roadmap that outlines the high-level plan for your business to help you plan and guide your business through a full PCI gap analysis, remediation, and formal compliance through the official PCI on-site assessment (QSA)
- **PCI gap analysis** – This service provides an assessment of your current compliance posture against the PCI DSS, identifies areas that are not compliant, and provides recommendations for remediation. This engagement should be performed prior to an official PCI Audit

- **PCI remediation services** – We offer a wide range of products and services to help your organization meet all 12 PCI DSS requirements, and can customize solutions to address your specific needs
- **PCI DSS Self-Assessment Questionnaire review** – For merchants required to demonstrate compliance by means of a Self-Assessment Questionnaire (SAQ), a Bell Qualified Security Assessor (QSA) can work with you to review your completed questionnaire prior to submission
- **PCI on-site assessment (QSA Audit)** – Certified QSAs will perform an official PCI DSS assessment to confirm that your organization is compliant, including validation of all applicable PCI requirements, a Report on Compliance (ROC), and identification of remediation areas
