

# Mobile solutions for transportation.

Boost efficiency with road-ready solutions from Bell.

With drivers constantly on the road, reliable communication is essential. Mobile solutions from Bell deliver communication tools that allow drivers to connect instantly with dispatchers for optimal route planning and scheduling. A closely connected workforce is more productive and can complete more deliveries with real-time visibility of order status, and the exact location of client assets. Bell also offers mobile technology that enables you to manage and track your fleet, giving you greater control over fuel expenses and vehicle maintenance costs, while minimizing theft.

## Fleet management and dispatch.

Track your vehicles in real-time.

- Cut fuel costs by planning efficient routes and managing engine idling in real-time
- Get comprehensive reports and live monitoring of driver logs
- Reduce operational costs by rerouting drivers away from toll roads
- Keep customers informed of delivery status in real-time and shorten delivery times
- Receive diagnostic alerts to optimize vehicle maintenance and reduce repair costs, allowing you to keep your assets on the road longer

## Asset tracking.

Monitor and track your goods.

- Track deliveries in real-time
- Minimize cargo spoilage with up-to-the-minute temperature alerts
- Prevent on-site theft and recover stolen materials

## Worker safety.

Generate accurate reports.

- Get access to driver logs for improved auditing functionality
- Improve driver and highway safety
- Stay compliant with hours of service regulations in Canada and the U.S. and avoid associated fines

## Instant communication / Push-to-talk (PTT).

Connect instantly with the push of a button.

- Communicate delivery change requests, status updates and traffic alerts instantly
- Maximize workforce productivity by optimizing order dispatch
- Manage and update all of your PTT contacts and groups online, to ensure that the latest lists are available on all user's devices

Samsung Galaxy Rugby™ LTE
