A superior TV experience.

Stunning picture quality

Bell TV receivers feature the very latest HDMI (High Definition Multimedia Interface) technology to ensure greater compatibility with even the most recent HD TVs and home theatre equipment. And because Bell TV receivers let you choose between 720p and 1080i HD resolutions, you can select the one that best matches the optimal resolution of your TV. You'll see the difference.

Record like a pro

Thanks to state-of-the-art micro-processors in Bell TV PVR's (Personal Video Recorders), you can record 2 shows while watching a third pre-recorded program – all at the same time and with the same digital quality picture. With server-grade hard drives in Bell PVRs, you don't have to worry about losing saved shows or movies.

Great on-screen guide

All Bell TV receivers feature the most advanced on-screen interface, delivering unmatched functionality. View up to 3 hours of programming schedules, up to 9 days in advance, using the entire width of your widescreen TV (a feature unique to Bell). Browse shows and movies with intuitive, Web-inspired search features, then record them on your Bell TV PVR right from the programming guide.

Choose a receiver.

There's a Bell TV receiver to suit your entertainment needs and budget.

Choose from two convenient ways to get Bell TV: Purchase your receiver for a one-time price, including a one-year warranty, or rent your receiver and subscribe to Bell TV programming for one monthly price. Lifetime warranty is included for as long as you are a rental customer.

A great start.

Standard Definition Receiver

A feature-rich, compact system.

- 100% digital signal
- On-screen programming guide
- Dolby® Digital 5.1 Surround Sound
